Preston Lane Consulting

Preston Lane Consulting (PLC) is a customer focused consulting agency, providing technical Manufacturing Execution System consulting and training services to manufacturing companies in high-tech industries.

Our goal at PLC is to provide High Quality, Professional and Reliable MES Consulting and Training services, utilizing the skills, experience and knowledge gained through many years of PROMIS consulting.

PLC has joined forces with **Lloyd Pritchard Consultants** to provide the “PROMIS On Call” Consulting Service to PROMIS Customers World-Wide.

Service Details

The PROMIS “On Call” Consulting Service provides remote consulting on NON-CRITICAL System and Application aspects of the PROMIS MES.

Individual customer contracts may differ in detail depending on specific requirements, however the main points of the service are

- Remote Consulting
- Billing By The Hour
- Contracted Response Times
- Dedicated Customer Email Address

The main benefits of the service are reduced costs compared to standard on site consulting and more rapid reaction to consulting requirements

Clients are only billed for hours worked, not for travel time and non-productive time on site and do not bear any travel or living costs usually charged for on site consulting. As no travel approvals and arrangements are required and reduced consultant availability issues occur, the response time to consulting requirements is significantly reduced.

Typically the client will raise an open Purchase Order during the initiation of the contract, meaning when ever consulting is required, there is no waiting time for the justification, raising and approval of Purchase Orders. Consultants will bill worked hours against these Purchase Orders and LPC will submit invoices according to contract detailing the exact hours worked per requirement.
