- **Upgrade to 5.8.x in one step from any release from 5.5 onwards.**
- **PROMIS Experts Availability**

### Preston Lane Consulting

Preston Lane Consulting (PLC) is a customer focused consulting agency, providing technical Manufacturing Execution System consulting and training services to manufacturing companies in high-tech industries.

Our goal at PLC is to provide High Quality, Professional and Reliable MES Consulting and Training services, utilizing the skills, experience and knowledge gained through many years of PROMIS consulting.

The main reasons why manufacturers upgrade their PROMIS systems are software version and hardware obsolescence as well as the great benefits gained from new functionality in newer versions. But with the integration of PROMIS with many other factory systems, the upgrading process has become more and more complex. Upgrading hardware, operating systems, database software and client applications, along with the traditional PROMIS application and database upgrade require experience and a detailed understand of the tasks involved.

PLC has joined forces with **Lloyd Pritchard Consulting** to provide the "PROMIS Upgrade" Consulting Service to PROMIS Customers World-Wide to make your upgrade process run as smoothly as possible.

### Service Details

The PROMIS Upgrade Consulting service will provide you with the PROMIS experts you need to assist with your upgrade. As few or as many as you need., including PROMIS:

- Application experts
- System experts
- Trainers
- Testers
- Programmers
- Documentation experts
- Automation experts.

We will help you upgrade your systems smoothly, successfully and with minimum production downtime.
