

FEATURES

Monitor

- Overall PROMIS Health
- PROMIS/TP Response Times
- PROMIS/ODS Response Times
- PROMIS Response Times

Alerts

- Slow Response Times
- System Processes Unresponsive

Analyze

- PROMIS, PROMIS/TP and ODS Response Times
- Export Data for Detailed Analysis
- PROMIS/TP log files for command specific response times.

BENEFITS

- Real time measures of response time
- Instant notification when problems arrive
- Detailed response time data stored for long term analysis

Preston Lane Consulting

Preston Lane Consulting (PLC) is a customer focused consulting agency, providing technical Manufacturing Execution System consulting and training services to manufacturing companies in high-tech industries.

Our goal at PLC is to provide High Quality, Professional and Reliable MES Consulting and Training services, utilizing the skills, experience and knowledge gained through many years of PROMIS consulting.

PLC now offers pMonitor for PROMIS as part of our product portfolio.

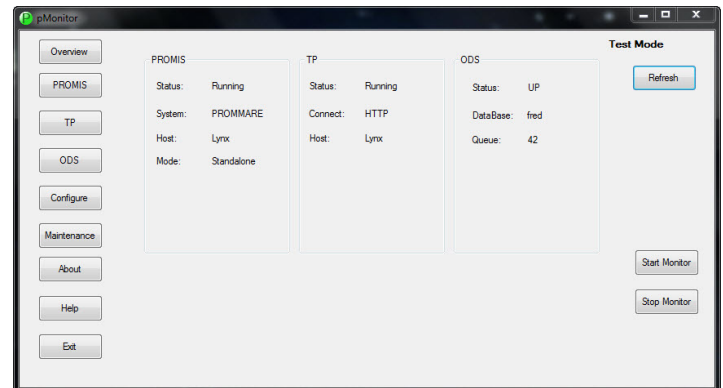

pMonitor is due for general release in Q1 2010. An initial Overview and a Prototype are currently available for demonstration and to present the current design. We welcome customer participation in the design of pMonitor and we hope to incorporate many of your requirements in the initial and future releases of the product.

Product Details

pMonitor connects to a live PROMIS system, including PROMIS/TP and the ODS. It monitors the health and response of these systems and can be configured to alert the PROMIS System Manager when problems arise.

pMonitor alerts the user when problems arise and helps pinpoint the cause. Separate alert and warning levels can be configured for PROMIS processes, PROMIS/TP commands and ODS database response.

pMonitor can be configured to run in the background and gather response time data. This data can be used for initial analysis inside the product or can be exported from its Microsoft Access database for more detailed investigation.
